DIGITAL LITERACY REPORT FILE

NAME: NAMRA RAFIQUE

REGISTRATION NO.: 25MEI10100

COURSE: DIGITAL LITERACY (1001)

FACULTY: DR. KANNAN SIR

INTRODUCTION :

Today's world, where technology is so important, being able to use computers is a must. It helps people use digital tools well, talk to each other safely, and stay safe online. This project is about many different parts of digital literacy, such as staying safe online, communicating, coding platforms, and being In aware of cybercrime.

Task 1: Infographic

I made an infographic for this task to explain what digital literacy is and why it is important in today's world. I talked about important topics like what digital literacy means, how to stay safe online, and how to use email properly. The infographic shows how people can safely use digital platforms while keeping their personal information safe.

I made the infographic with Canva because it has easy-to-use templates and design options that look good. Choosing icons and putting together

content in a way that was visually interesting was the most fun part. It was a little hard, though, to turn big ideas into short, meaningful points.

This task taught me how to present information in a creative and useful way. It also made me more aware of how to stay safe and communicate online.

DIGITAL LITERACY
WHAT IS DIGITAL LITERACY
*Ability to use digital tools.
*share and access information safely.
SAFE INTERNET TIPS
*Do not share OTP
*Use strong password
*Avoid unknown links
EMAIL ETIQUETTE
*Use proper subject
*Be polite
*Avoid informal language

Pages 1/1

Task 2: Digital Portfolio

I made and updated my digital portfolio on a number of sites, such as GitHub, LinkedIn, and Kaggle/Stack Overflow, for this task. I made a GitHub profile and added a README file to show off my skills and work. I changed my basic profile information and education information on LinkedIn.

These sites are important for creating a professional online presence. I want to use GitHub to share my coding projects and LinkedIn to meet professionals and look for job openings in the future.

This task helped me learn how important it is to keep a strong digital identity and how it can help me get ahead in my career.

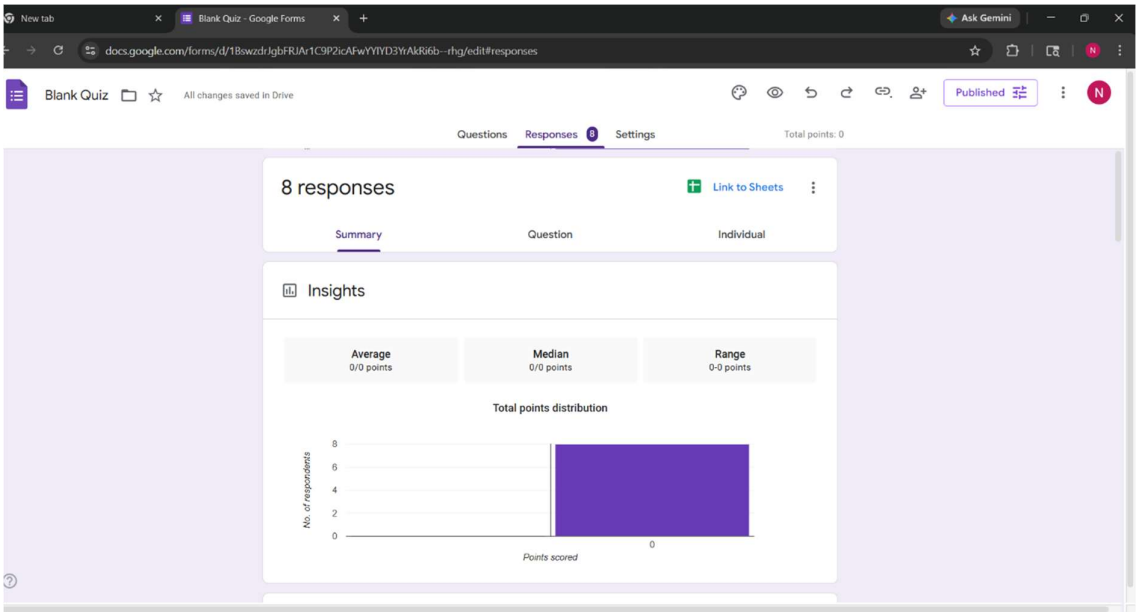
Task 3: Coding + Google Form

I made accounts on coding sites like HackerRank and CodeChef and solved one simple programming problem for this task. This helped me learn how to solve problems and practice coding.

I also made a Google Form with five questions about digital literacy. The form was made to be a quiz to see how well people know about online safety and digital

This task made me better at both technical and analytical tasks. It also helped me learn how to use online tools to collect data and learn.



Task 4: Emails + Do’s & Don’ts

Email 1: Professor (Extension)

Respected Sir/ Madam,

I hope you're doing well. I am writing to ask for a short extension on my assignment because of some things that I couldn't help but do.

I promise that I am working on the assignment and will turn it in as soon as I can. Please give me an extension, if you would.

Thanks for understanding.

Yours truly,

Namra Rafique

Email 2: Internship

Dear Sir or Madam,

I am writing to let you know that I would like to apply for an internship at your company. I am still in school and want to get hands-on experience and improve my skills.

I work hard, pick things up quickly, and love learning new things. I would be thankful for the chance to help out and learn from your group.

Please find my information attached. I can't wait to hear back from you.

Thanks.

Namra Rafique

Social Media Do’s & Don’ts

Do's:

Keep your privacy settings up to date

Share helpful and good things

Be respectful of others online

Make sure your passwords are strong.

Check the facts before sharing

Don'ts:

Don't give out personal information.

Don't tell lies about the news

Don't talk in a mean way.

Don't click on links you don't know.

Don't share too much about your location or details.

Task 5: Cybercrime

Topic:

Phishing Case Study:

Phishing is a common type of cybercrime. Attackers trick users into giving away sensitive information like passwords or bank details. A typical case involves users getting fake emails or messages that look like they come from trusted sources, such as banks. These messages usually have links that take users to fake websites. In one case, a user clicked on a fake banking link and entered their login information. Within minutes, someone made unauthorised transactions from their account. This demonstrates how dangerous phishing attacks can be. In India, users can report such crimes by visiting cybercrime.gov.in or calling the helpline at 1930.
Prevention Tips:-

Never click on unknown links

Check website URLs carefully

Enable two-factor authentication

Avoid sharing OTPs

Use secure networks

Update passwords regularly

Verify sender identity- Use official apps for UPI transaction.

Conclusion:

This project helped me learn how important digital literacy is and how to use it in real life. I learned how to use different websites, talk to people in a professional way, and stay safe online. These skills will help me grow in school and at work.
